## Experience

### Agricultural Transformation Institute (ATI) Team Project 2026 – Present

- Collaborating with a development team to build a Visitor Management System for ATI.
- Responsible for designing and developing the login page user interface.
- Creating a clean, intuitive, and responsive login experience based on the project's requirements.
- Translating UI/UX ideas into a functional web interface using modern frontend technologies.
- Working with team members to refine the design and ensure consistency with the overall system.

### Personal Projects Independent Projects 2024 – Present

- Design and develop personal web applications from initial concept and UI/UX design through implementation.
- Create user-centered interfaces with a focus on usability, accessibility, responsiveness, and clean visual design.
- Develop responsive frontend applications using HTML, CSS, JavaScript, TypeScript, React, Next.js, and Tailwind CSS.
- Build and integrate backend functionality, APIs, databases, authentication, and application logic when required.
- Transform UI/UX designs and prototypes into functional, responsive web applications.
- Use Git and GitHub for source-code management and project version control.
- Debug, test, and continuously improve applications based on usability and technical requirements.
- Explore modern web-development practices and continuously build practical skills through independent projects.

## Skills

- **UI/UX:** Figma
- **Frontend:** HTML, CSS, JavaScript, TypeScript, React, Next.js, Tailwind CSS
- **Backend:** Node.js, REST API, Authentication, Databases
- **Tools:** Git, GitHub, VS Code
